12. Payment Infrastructure (Paystack + Telco Wallet)
13. Digital Inclusion & Multi-Channel Analytics
14. Complete Test Script: Step-by-Step Demo Flow
15. Revenue Model & Telco Partnership Opportunities
16. Technical Architecture Summary

1. EXECUTIVE SUMMARY

Tradoja is Africa's first farmer-first agricultural marketplace designed to work on **any device** - from basic feature phones (via SMS and USSD) to WhatsApp and web browsers. The platform connects smallholder farmers directly with buyers, eliminates exploitative middlemen, and ensures safe transactions through AI-powered escrow.

TradojaIQ is the AI brain powering the entire marketplace - providing smart price discovery, dynamic trust scores, demand forecasting, and farmer alerts across every channel.

WHY THIS MATTERS FOR TELCO PARTNERS

TELCO REVENUE OPPORTUNITY: Every SMS command, USSD session, and payment transaction generates telco revenue. Tradoja transforms agricultural trade into a recurring telco revenue stream across Nigeria's 38M+ farming households.

Metric	Value	Telco Impact
Target Users	38M+ farming households	New USSD/SMS subscribers
SMS Commands	15+ trading commands	Per-message revenue
USSD Sessions	Full trading via *712*55#	Session-based billing
Transaction Volume	N4k-N15k per batch trade	1.5-5% platform fees
Channels	SMS + USSD + WhatsApp + Web (all in one)	Multi-channel engagement
Escrow Payments	AI-verified release	Payment float revenue
AI Intelligence	TradojaIQ Engine	Price guidance, trust scores, demand insights

2. QUICK START: DEMO CREDENTIALS & ACCESS

Platform URL:

<https://3318dc41-dff8-459c-aa89-3c5076b2c33c-00-nt9yemr81ich.riker.replit.dev>

Role	Email	Password	What You Can Test
Admin	admin@tradoja.com	admin123	Full admin dashboard, analytics, SMS/USSD dashboards
Farmer	farmer@demo.com	farmer123	Produce listings, farmer dashboard, escrow
Buyer	buyer@demo.com	buyer123	Marketplace, purchasing, buyer dashboard
Agent	agent@demo.com	agent123	Field agent onboarding, bulk registration

3. USSD ACCESS (*712*55#)

TELCO PRIORITY FEATURE - This is the primary revenue channel for telco partners. Every USSD session generates session-based billing revenue. The USSD gateway enables 100% of Nigeria's 200M+ mobile subscribers to trade - including the 60%+ without smartphones.

HOW TO TEST: USSD SIMULATOR

Open: <https://3318dc41-dff8-459c-aa89-3c5076b2c33c-00-nt9yemr81ich.riker.replit.dev/simulator/ussd>

Step-by-Step USSD Demo:

1. Navigate to the USSD Simulator page
2. Enter any phone number (e.g., 08012345678)
3. Dial ***712*55#** to start a session
4. You will see the main menu with options:
 - 1 - Register (new farmer/buyer/transporter)
 - 2 - Sell Produce (list crops for sale)
 - 3 - Buy Produce (browse and purchase)
 - 4 - Check Prices (market intelligence)
 - 5 - My Orders (track purchases/sales)
 - 6 - Check Balance (T2 wallet balance)
 - 7 - SabiBuy (group-buy campaigns)
 - 8 - Get Help
 - 9 - Transport Jobs
 - 10 - Start Campaign (SabiBuy)
5. Select option **1** to register as a farmer
6. Follow prompts: enter name, select state, enter crop type
7. After registration, go back and test **option 2** (Sell) and **option 4** (Prices)

TELCO REVENUE MODEL: Each USSD session generates N4-N7 in telco revenue. With 10,000 daily active farmers, this equals N40,000 - N70,000 daily USSD revenue for the telco partner, growing to millions as adoption scales across Nigeria's 36 states.

USSD MENU STRUCTURE

Option	Function	Sub-menus	Revenue per Session
1	Register	Farmer/Buyer/Transport/Agent	N4-N7
2	Sell Produce	Crop > Qty > Price > Location	N4-N7
3	Buy Produce	Browse > Select > Order	N4-N7

4	Check Prices	Crop > Region > Live Prices	N4-N7
5	My Orders	Active > History > Track	N4-N7
6	Check Balance	T2 Wallet Balance	N4-N7
7	SabiBuy	Join Campaign > Pay	N4-N7
9	Transport Jobs	Available > Claim > Track	N4-N7
10	Start Campaign	Create SabiBuy Campaign	N4-N7

4. SMS TRADING ENGINE

TELCO PRIORITY FEATURE - Every SMS command generates N4-N5 in telco revenue per message. The platform absorbs SMS costs within the 1.5% transaction fee, making it free for farmers while generating telco revenue. 15+ SMS commands cover the entire trading lifecycle.

HOW TO TEST: SMS SIMULATOR

Open: <https://3318dc41-dff8-459c-aa89-3c5076b2c33c-00-nt9yemr81ich.riker.replit.dev/simulator/sms>

Simulator Features:

- * Editable phone number with random generation button
- * Demo account quick-switcher (Farmer/Buyer/Transport)
- * New Session button for fresh testing
- * Real-time response display

COMPLETE SMS COMMAND REFERENCE

Command	Format	Description	Example
REG	REG [name] [loc] [crop]	Register as farmer	REG Tunde Lagos Tomatoes
SELL	SELL [crop] [qty] [price]	List produce for sale	SELL Tomatoes 50KG 800
PRICE	PRICE [crop]	Check market prices	PRICE Yam
ACCEPT	ACCEPT [order-code]	Accept an order	ACCEPT ORD-A1B2
PICKUP	PICKUP [order-code]	Confirm pickup	PICKUP ORD-A1B2
DELIVER	DELIVER [code] [OTP]	Confirm delivery with OTP	DELIVER ORD-A1B2 4821
TRACK	TRACK [code/MYORDERS]	Track orders	TRACK ORD-A1B2
CANCEL	CANCEL [code] [reason]	Cancel order with reason	CANCEL ORD-A1B2 bad quality
STATUS	STATUS	Account status summary	STATUS
BAL	BAL	Check wallet balance	BAL
JOBS	JOBS	View transport jobs	JOBS
VOUCH	VOUCH [phone]	Vouch for another farmer	VOUCH 08012345678
CAMPAIGNS	CAMPAIGNS	View SabiBuy campaigns	CAMPAIGNS
SABIBUY	SABIBUY [code] [qty]	Join group-buy	SABIBUY OBI-SB-48K 10
HELP	HELP	Show all commands	HELP

AI-POWERED SMS COMMANDS

Command	Format	Description	AI Feature
AI	AI [natural language]	Smart assistant	Parses natural language into commands
ADVICE	ADVICE [crop]	Price intelligence	AI analyzes market data for recommendations
RISK	RISK [order-code]	Transaction safety	AI scores buyer/seller risk factors
TRACE	TRACE [code]	Produce journey	Blockchain-style supply chain tracking
QUALITY	QUALITY [code] [A/B/C]	Quality grading	Records quality at each supply chain stage

SMS REVENUE PROJECTION: With 15+ commands per trade cycle and an average of 3 trades per farmer per month, each active farmer generates 45+ SMS messages monthly. At N4-5/message, 100,000 active farmers = N18M-N22.5M monthly SMS revenue for the telco.

5. WHATSAPP TRADING CHANNEL

WhatsApp is the game-changer channel for Tradoja. With 90M+ WhatsApp users in Nigeria, this channel provides rich media trading with photos, payment links, interactive messages, and the same full trading experience as SMS - but with a richer, more intuitive interface. All WhatsApp transactions sync with SMS, USSD, and Web in real-time.

HOW TO TEST: WHATSAPP SIMULATOR

Open: <https://3318dc41-dff8-459c-aa89-3c5076b2c33c-00-nt9yemr81ich.riker.replit.dev/simulator/whatsapp>

Step-by-Step WhatsApp Demo:

- 1. Navigate to the WhatsApp Simulator page
- 2. The simulator shows an authentic WhatsApp-style phone interface
- 3. Enter any phone number (e.g., +2348012345678)
- 4. Type **HI** or **HELLO** - Get a welcome message with your trust badge
- 5. Type **HELP** - See all available commands
- 6. Try: **MARKET** - Browse produce with trust badges and price guidance
- 7. Try: **PRICE Tomatoes** - Get TradojaIQ market intelligence
- 8. Try: **SELL Tomatoes 50KG 8000 Lagos** - List produce with AI price guidance
- 9. Try: **BUY [listing_id]** - Purchase with escrow protection
- 10. Try: **SABIBUY LIST** - Browse group-buy campaigns

COMPLETE WHATSAPP COMMAND REFERENCE

Command	Format	Description
Register	REG [name] [state] [crop]	Create LITE account instantly
Sell	SELL [crop] [qty] [price] [location]	List produce with AI price guidance
Market	MARKET or MARKET [crop]	Browse listings with trust badges
Buy	BUY [listing_id]	Purchase with escrow protection
My Listings	MYLIST	View your active produce listings
Orders	ORDERS	View all buy/sell orders
Track	TRACK [order_code]	Track order status and delivery
Accept	ACCEPT [order_code]	Farmer accepts an order (generates OTP)
Price Check	PRICE [crop]	TradojaIQ market intelligence
Balance	BAL	Check wallet balance
SabiBuy List	SABIBUY LIST	View active group-buy campaigns

SabiBuy Join	SABIBUY JOIN [code] [qty]	Join a campaign
SabiBuy Create	SABIBUY CREATE [id] [price] [qty] [location]	Start a campaign
Rate	RATE [order_code] [1-5] [comment]	Rate a transaction
Verify	VERIFY	Start identity verification (LITE to VERIFIED)
Status	STATUS	Account summary and trust score
Complaint	COMPLAINT [text]	File a complaint or dispute
Help	HELP	Show all available commands

CROSS-CHANNEL SYNC

All WhatsApp transactions are fully synchronized with SMS, USSD, and Web channels. A farmer can list produce via WhatsApp, a buyer can purchase via SMS, and the admin can track everything on the web dashboard. The same wallet, escrow, and order system powers all channels.

Production Readiness: The WhatsApp service uses an abstraction layer - currently running in simulation mode for demos. When Twilio WhatsApp credentials are added, it activates as a production channel with zero code changes. The webhook endpoint is ready at `/webhook/whatsapp`.

6. TRADOJAIQ AI MARKET INTELLIGENCE

TradojaIQ is the AI brain of the Tradoja marketplace. It analyzes every transaction, listing, and user interaction to provide real-time market intelligence that empowers farmers to get fair prices and helps buyers find quality produce. TradojaIQ works across all channels - Web, SMS, USSD, and WhatsApp.

FOUR PILLARS OF TRADOJAIQ

- 1. Smart Price Discovery** - Analyzes transaction history to calculate fair market prices per crop, per region. Tells farmers if their price is above, below, or at market rate. Shows price trends (rising/falling/stable).
- 2. Dynamic Trust Scores** - Every user gets a 0-100 trust score with tiers: Bronze (0+), Silver (40+), Gold (70+), Platinum (90+). Scores are based on verification status, completed transactions, ratings, dispute history, account age, and verification extras.
- 3. Demand Forecasting** - Identifies which crops are most in-demand based on buyer search patterns and purchase history. Shows demand trends to help farmers plan what to grow.
- 4. Farmer Alerts** - Proactive notifications when crops are in high demand, when prices spike in a region, or when a farmer's listing is priced significantly below market value.

HOW TO TEST TRADOJAIQ

Web Dashboard: Open <https://3318dc41-dff8-459c-aa89-3c5076b2c33c-00-nt9yemr81ich.riker.replit.dev/intelligence> - Full intelligence dashboard

Price API: Visit <https://3318dc41-dff8-459c-aa89-3c5076b2c33c-00-nt9yemr81ich.riker.replit.dev/api/tradojaiq/price/Tomatoes> - Price intelligence for any crop

Trust API: Visit <https://3318dc41-dff8-459c-aa89-3c5076b2c33c-00-nt9yemr81ich.riker.replit.dev/api/tradojaiq/trust/1> - Trust score for any user

Demand API: Visit <https://3318dc41-dff8-459c-aa89-3c5076b2c33c-00-nt9yemr81ich.riker.replit.dev/api/tradojaiq/demand> - Top demanded crops

Summary API: Visit <https://3318dc41-dff8-459c-aa89-3c5076b2c33c-00-nt9yemr81ich.riker.replit.dev/api/tradojaiq/summary> - Full marketplace intelligence

WhatsApp: Send [PRICE Tomatoes](#) in WhatsApp simulator

SMS: Send [PRICE Tomatoes](#) in SMS simulator

During Listing: When a farmer lists produce (SELL), TradojaIQ automatically shows price guidance

TRUST SCORE BREAKDOWN

Component	Max Points	How It Works
-----------	------------	--------------

Verification Status	20	LITE=5, Pending=10, Verified=20
Completed Transactions	25	3 points per completed order (max 25)
User Ratings	20	Based on average star rating (1-5)
Dispute Record	+15/-15	+15 if clean, -5 per unresolved dispute
Account Tenure	10	1 point per month (max 10)
Verification Extras	10	Phone verified +3, Agent verified +4, ID verified +3

7. AI-POWERED ESCROW & TRANSACTION INTELLIGENCE

TELCO PRIORITY FEATURE - The escrow system holds buyer payments until delivery is confirmed via OTP + AI verification + location matching. This builds trust in the ecosystem and enables higher transaction volumes - directly increasing telco revenue through more SMS/USSD sessions per trade.

ESCROW FLOW: HOW IT WORKS

- 1. **BUYER PLACES ORDER** - Payment is held in escrow (not released to farmer)
- 2. **FARMER ACCEPTS** - Sends SMS: ACCEPT ORD-XXXX (auto-generates delivery OTP)
- 3. **TRANSPORTER CLAIMS** - Sends SMS: JOBS then CLAIM ORD-XXXX
- 4. **LOCATION TRACKING** - Sends SMS: LOCATION ORD-XXXX 6.5244, 3.3792
- 5. **DELIVERY + OTP** - Transporter sends: DELIVER ORD-XXXX [4-digit OTP]
- 6. **AI VERIFICATION** - System checks: OTP valid? Location near destination? Time window OK?
- 7. **ESCROW RELEASE** - If all checks pass, payment auto-releases to farmer's wallet
- 8. **DISPUTE PATH** - If checks fail, escrow is held and dispute is auto-created

AI VERIFICATION SIGNALS

Before releasing escrow, the AI evaluates multiple signals to prevent fraud:

Signal	What It Checks	Weight
OTP Verification	Correct 4-digit code (3 attempts max, 24hr expiry)	Critical
Location Match	GPS coordinates near delivery destination	High
Time Window	Delivery within expected time frame	Medium
Buyer History	Past transaction patterns and dispute rate	Medium
Seller History	Farmer reliability score and past deliveries	Medium
Amount Analysis	Transaction amount vs. typical market prices	Low

SCAM DETECTION ENGINE

8-rule scoring system protects farmers and buyers from fraud. Triggers include: suspicious registration patterns, unrealistic prices, quick buy-relist behavior, device fingerprint collisions, and unverified trader activity. High-score detections auto-alert admin via SMS.

Admin Scam Dashboard: <https://3318dc41-dff8-459c-aa89-3c5076b2c33c-00-nt9yemr81i.ch.riker.replit.dev/admin/scams>

TELCO PARTNERSHIP FOR LICENSED ESCROW

Holding customer funds in escrow requires a CBN (Central Bank of Nigeria) Payment Service Provider license. Nigerian telcos like MTN (MoMo), Airtel (Smartcash), and 9mobile (T2) already hold these licenses through their fintech subsidiaries. A telco partnership provides: (1) Licensed escrow infrastructure - they legally hold the funds, (2) Free or subsidized SMS/USSD channels, (3) Mobile money integration for unbanked farmers, (4) Access to their subscriber base. Tradoja provides the marketplace, farmer network, and technology. The current escrow system demonstrates the complete flow and is ready to integrate with a licensed telco partner's payment infrastructure.

8. BLOCKCHAIN-STYLE TRACEABILITY

Every produce item gets a cryptographic SHA256 hash chain - providing immutable, verifiable tracking from farm to buyer without the cost of actual blockchain infrastructure.

HOW TO TEST

- 1. Open SMS Simulator:
<https://3318dc41-dff8-459c-aa89-3c5076b2c33c-00-nt9yemr81ich.riker.replit.dev/simulator/sms>
- 2. Send: TRACE to see help
- 3. When an order is created and accepted, trace events are automatically recorded
- 4. Each event (packaging, pickup, in-transit, delivery) creates a hash-chained record
- 5. View web trace at: <https://3318dc41-dff8-459c-aa89-3c5076b2c33c-00-nt9yemr81ich.riker.replit.dev/trace/CHN-XXXXXX>
- 6. The web viewer shows: journey timeline, integrity verification, quality grades

TRACE CHAIN DATA MODEL

Field	Description
chain_code	Unique identifier (CHN-XXXXXX)
crop_type	Type of produce being tracked
origin_farm	Source farmer name/ID
origin_state	Farm location/state
hash_chain	SHA256 cryptographic hash linking events
integrity_verified	Whether chain integrity is intact
Events	packaging > pickup > in_transit > location_update > delivery > quality_check

9. SABIBUY GROUP-BUY ENGINE

SabiBuy is a zero-stock middleman trading system. Anyone can earn N4,000-N15,000 profit per batch by organizing group purchases. Campaign captains create deals, share unique codes via SMS/USSD/Web, and earn when batches fill up - all with zero inventory risk.

HOW TO TEST

Web: <https://3318dc41-dff8-459c-aa89-3c5076b2c33c-00-nt9yemr81ich.riker.replit.dev/sabibuy>

SMS: Send SABIBUY or CAMPAIGNS

USSD: Dial *712*55# > Option 7 (SabiBuy) or Option 10 (Start Campaign)

Tier	Cost	Max Campaigns	Profit Range
Free	N0	2 active	N4,000/batch
Captain	N2,500/month	10 active	N8,000/batch
Premium	N5,000/month	Unlimited	N15,000/batch

10. ANTI-RESELLER & FARMER PROTECTION

Tradoja is **farmer-first**. The platform actively protects farmers from exploitative middlemen through:

Trader Verification - Traders must prove value-add (transport, processing, storage, etc.)

Reseller Detection - 10-rule scoring: no logistics, high markup, quick relist, device collision, etc.

Tiered Fees - Farmer-direct: 2%, Verified trader: 3.5%, Unverified: 5%

Farmer Listing Preferences - Farmers choose: all buyers, verified traders only, or direct buyers only

Community Vouching - 3 verified farmers must vouch for new farmers (SMS: VOUCH [phone])

Continuous Verification - 90-day expiry, monthly activity checks, rating triggers

Captain Bond - N10,000 refundable deposit for SabiBuy campaigns

Device Fingerprinting - Detects multi-account collusion via IP/user-agent/device ID

Admin Trader Verification: <https://3318dc41-dff8-459c-aa89-3c5076b2c33c-00-nt9yemr81ich.riker.replit.dev/admin/trader-verification>

Buyer Dashboard (shows verification): <https://3318dc41-dff8-459c-aa89-3c5076b2c33c-00-nt9yemr81ich.riker.replit.dev/buyer/dashboard>

12. PAYMENT INFRASTRUCTURE

Dual payment system: **Paystack** for web/card payments and **T2 Wallet** (9mobile integration) for USSD-based payments. Both integrate with the escrow system.

Channel	Method	Use Case	Telco Integration
Web	Paystack (Card/Bank)	Online purchases, subscriptions	Standard
USSD	T2 Wallet (*712*55#)	Feature phone payments	Direct telco billing
SMS	Paystack USSD	SMS-initiated payment	USSD pop-up trigger
SabiBuy	Paystack Subscription	Captain tier upgrades	Recurring billing
Escrow	Platform Hold	Transaction protection	Float revenue opportunity

FEE STRUCTURE

Transaction Type	Fee	Who Pays
Farmer-direct sale	2%	Split buyer/farmer
Verified trader purchase	3.5%	Trader
Unverified trader purchase	5%	Trader
Logistics booking	3%	Requester
SabiBuy Captain (Free tier)	0%	N/A
SabiBuy Captain upgrade	N2,500-N5,000/mo	Captain

13. DIGITAL INCLUSION & MULTI-CHANNEL ANALYTICS

TELCO ALIGNMENT: Tradoja is designed for digital inclusion - reaching the 60%+ of Nigerian mobile subscribers who use feature phones. Every channel generates telco revenue.

Channel	Device Required	Registration	Trading	Status
USSD (*712*55#)	Any phone	Full	Full	Simulator Ready
SMS	Any phone	Full (REG)	Full (15+ cmds)	Simulator Ready
Web	Smartphone/PC	Full	Full	Live
WhatsApp	Smartphone	Full (REG)	Full (15+ cmds)	Simulator Ready
Agent-Assisted	Agent phone	Full	Via agent	Live

MULTILINGUAL SUPPORT

SMS and USSD support 5 languages: **English, Yoruba, Hausa, Pidgin, Igbo**. Language is auto-detected or user-selected. This ensures accessibility across Nigeria's diverse population.

Digital Inclusion Dashboard: <https://3318dc41-dff8-459c-aa89-3c5076b2c33c-00-nt9yemr81ich.riker.replit.dev/admin/digital-inclusion>

14. COMPLETE TEST SCRIPT: STEP-BY-STEP DEMO

Follow this script for a compelling 20-25 minute demo. Each section includes the exact steps, commands, and expected results.

DEMO PART 1: SMS FARMER JOURNEY (5 min)

TELCO TALKING POINT: "Every one of these SMS messages generates N4-5 in telco revenue. Watch how a farmer with a basic phone can trade."

1. Open SMS Simulator: <https://3318dc41-dff8-459c-aa89-3c5076b2c33c-00-nt9yemr81ich.riker.replit.dev/simulator/sms>
2. Click 'New Session' for a fresh phone number
3. Send: **HELP** - Shows all 15+ available commands
4. Send: **REG Amina Lagos Tomatoes** - Registers a farmer instantly
5. Send: **SELL Tomatoes 100KG 5000** - Lists produce for sale
6. Send: **PRICE Tomatoes** - Gets current market prices
7. Send: **STATUS** - Shows account summary
8. Send: **ADVICE Tomatoes** - AI recommends pricing strategy
9. Point out: That was 6 SMS messages = N24-30 telco revenue from ONE farmer session

DEMO PART 2: USSD BUYER JOURNEY (3 min)

TELCO TALKING POINT: "USSD sessions generate N4-7 per session. This works on ANY phone - even a N2,000 feature phone."

1. Open USSD Simulator: <https://3318dc41-dff8-459c-aa89-3c5076b2c33c-00-nt9yemr81ich.riker.replit.dev/simulator/ussd>
2. Enter phone number and dial ***712*55#**
3. Select **1** (Register) > Choose Buyer > Enter name > Select state
4. Back to main menu > Select **3** (Buy Produce) > Browse listings
5. Select **4** (Check Prices) > Enter crop name > See live prices
6. Select **6** (Check Balance) > Show T2 wallet integration
7. Point out: The USSD shortcode ***712*55#** is ready for telco activation

DEMO PART 3: ESCROW + AI INTELLIGENCE (4 min)

TELCO TALKING POINT: "Escrow builds trust. More trust = more transactions = more SMS/USSD sessions = more telco revenue. The AI catches fraud before it happens."

1. In SMS Simulator, explain the escrow flow:

Buyer pays > Money held in escrow > Farmer accepts > Transporter delivers
> OTP verified > AI checks signals > Escrow releases to farmer

2. Show AI features:

Send: `AI I want to sell 50kg of yam for 15000`

(AI parses natural language into structured SELL command)

3. Show scam detection:

Open: `https://3318dc41-dff8-459c-aa89-3c5076b2c33c-00-nt9yemr81ich.riker.replit.dev/admin/scams` (login as admin first)

Show the 8-rule scoring system and admin actions (approve/ban/call)

4. Show traceability:

Send: `TRACE` - Explains blockchain-style tracking

Show the web viewer with cryptographic hash chain verification

DEMO PART 4: ADMIN & ANALYTICS (3 min)

1. Login as admin: <https://3318dc41-dff8-459c-aa89-3c5076b2c33c-00-nt9yemr81ich.riker.replit.dev/login>

Email: admin@tradoja.com / Password: admin123

2. Admin Dashboard: <https://3318dc41-dff8-459c-aa89-3c5076b2c33c-00-nt9yemr81ich.riker.replit.dev/admin/dashboard>

Show: total users, produce listings, orders, logistics requests

3. SMS Dashboard: <https://3318dc41-dff8-459c-aa89-3c5076b2c33c-00-nt9yemr81ich.riker.replit.dev/admin/sms-dashboard>

Show: SMS interaction logs, command usage analytics, user activity

4. USSD Dashboard: <https://3318dc41-dff8-459c-aa89-3c5076b2c33c-00-nt9yemr81ich.riker.replit.dev/admin/ussd-dashboard>

Show: USSD session data, menu navigation patterns

5. Digital Inclusion: <https://3318dc41-dff8-459c-aa89-3c5076b2c33c-00-nt9yemr81ich.riker.replit.dev/admin/digital-inclusion>

Show: channel breakdown (SMS vs USSD vs Web), language analytics

6. Payment Analytics: <https://3318dc41-dff8-459c-aa89-3c5076b2c33c-00-nt9yemr81ich.riker.replit.dev/admin/payments>

Show: transaction fees, escrow status, revenue breakdown

DEMO PART 5: SABIBUY GROUP-BUY (2 min)

1. Open SabiBuy: <https://3318dc41-dff8-459c-aa89-3c5076b2c33c-00-nt9yemr81ich.riker.replit.dev/sabibuy>

2. Show the campaign listing and leaderboard

3. In SMS Simulator, send: **CAMPAIGNS**

4. Explain: Anyone can become a campaign captain, earn N4k-N15k per batch

5. Show multi-channel access: Web + SMS + USSD option 7

6. Point out subscription tiers: Free > Captain > Premium

DEMO PART 6: WHATSAPP TRADING (3 min)

1. Open WhatsApp Simulator: <https://3318dc41-dff8-459c-aa89-3c5076b2c33c-00-nt9yemr81ich.riker.replit.dev/simulator/whatsapp>

2. Type **HI** - Shows welcome with trust badge

3. Type **MARKET** - Browse produce with trust badges and prices

4. Type **PRICE Tomatoes** - TradojaIQ market intelligence

5. Type **SELL Rice 100KG 25000 Lagos** - List with price guidance

6. Type **SABIBUY LIST** - Show cross-channel SabiBuy access

7. Point out: Same database, same escrow, same wallet as SMS/USSD/Web

DEMO PART 7: TRADOJAIQ INTELLIGENCE (2 min)

1. Open TradojaIQ Dashboard: <https://3318dc41-dff8-459c-aa89-3c5076b2c33c-00-nt9yemr81ich.riker.replit.dev/intelligence>
2. Show marketplace summary: total users, listings, transactions, avg trust score
3. Show demand insights: which crops are most in-demand
4. Show trust score breakdown: Bronze/Silver/Gold/Platinum distribution
5. Show top crops: most active crops on the platform
6. Point out: This intelligence powers price guidance on ALL channels automatically

DEMO CLOSING STATEMENT

KEY MESSAGE: "Tradoja transforms every agricultural trade into telco revenue. With SMS, USSD, WhatsApp, and AI-powered TradojaIQ intelligence, we're building the infrastructure for Africa's food security - and your shortcode activation is the key to unlocking this for 38 million farming households."

15. REVENUE MODEL & TELCO PARTNERSHIP

JOINT REVENUE STREAMS

Revenue Stream	Tradoja Share	Telco Share	Scale Potential
SMS Messages (N4-5 each)	Transaction fees	Per-message revenue	45+ msgs/farmer/month
USSD Sessions (N4-7 each)	Transaction fees	Session billing	10+ sessions/farmer/month
Transaction Fees (1.5-5%)	Platform revenue	Payment processing	N4k-N500k per trade
Escrow Float	Interest earned	Banking partnership	Millions in float daily
SabiBuy Subscriptions	Subscription revenue	Billing partnership	N2.5k-N5k/captain/month
Data & Analytics	Market intelligence	Subscriber insights	Agricultural market data

WHAT WE NEED FROM THE TELCO

- 1. **Shortcode Activation** - *712*55# for USSD access (or alternative shortcode)
- 2. **SMS Shortcode** - Dedicated SMS shortcode for trading commands
- 3. **Bulk SMS Pricing** - Competitive rates for platform-initiated notifications
- 4. **T2 Wallet API Access** - For USSD-based payments (9mobile)
- 5. **Revenue Share Agreement** - Fair split on SMS/USSD revenue generated
- 6. **Go-to-Market Support** - Joint farmer outreach in pilot states (Lagos, Oyo, Kano)
- 7. **Escrow License Partnership** - Telco's PSP/MMO license for legal fund holding in escrow

16. TECHNICAL ARCHITECTURE

Component	Technology	Purpose
Web Framework	Flask (Python)	Core application server
Database	PostgreSQL (Neon)	Scalable data storage
Authentication	Flask-Login + OTP	Web login + SMS verification
Payments	Paystack + T2 Wallet	Card + USSD payments
AI Engine	OpenAI GPT	Natural language, risk scoring, escrow verification
SMS Gateway	Africa's Talking API	SMS command processing
USSD Gateway	Africa's Talking API	Feature phone menus
Traceability	SHA256 Hash Chain	Blockchain-style supply chain tracking
Escrow	Platform-managed + AI	Secure payment holding and release
Scam Detection	8-rule scoring engine	Fraud prevention
Frontend	Bootstrap 5 + Jinja2	Responsive dark theme UI
WhatsApp Gateway	Twilio (simulator mode)	Rich media trading channel
Market Intelligence	TradojaIQ Engine	Price discovery, trust scores, demand insights
Hosting	Replit Cloud	Auto-scaling deployment

DATA MODELS OVERVIEW

40+ database tables covering: Users (role-based), Produce (with GI certification), Orders (with OTP escrow), Transactions (Paystack + T2), Transport (cold chain IoT), SabiBuy (campaigns + orders), TraceChain (hash-linked events), ScamFlags (8-rule scoring), SMS/USSD Interactions (full audit trail), Device Fingerprints (collusion detection), Disputes (SLA-tracked), and more.
